

# João Vítor Freitas

I just graduated from Economics (2020.2) and found myself in love with data and analytics. I have projects on sales prediction, statistical inference, web scraping, data analysis and more. I'm really passionate about this field, I've been studying since I discovered it. Please feel free to check my github for more info.

## EXPERIENCE

### Cidadão Fiscal, Recife — Data Internship

April 2020 - November 2020

Developed a solution that helps people understand better politicians and legislative houses regarding bills and public spending. More of this project can be found on <https://github.com/jvbf97/chico> and <https://github.com/CidadaoFiscal>.

### CESAR, Recife — Summer Job Intern

January and February 2020

Developed a business model of a digital payment system for SulAmérica insurance company, Introducing the company for the first time in the “fintech” market. This payment system has an estimated income of 75 thousand reais each year and can be scaled to more than 3 million, when insurance brokers use the system.

### PIBIC, UFPE — Researcher

July 2018 - July 2019

Conducted an econometric analysis on the performance of economies that adopt sovereign wealth funds, seeking to understand the effect of a fund on the country's optimal fiscal policy.
